DETAILED ACTION

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: The prior art of record, either alone or in combination, fails to teach, suggest, or render obvious the combined limitations of each of the independent claims.

Specifically, the instant invention describes a system and methods to mechanically control/direct (e.g., move, focus, collect an image) an image pickup device (e.g., camera, scanner) from an operation device (e.g., computer) to obtain an image. Obtained images are monitored for the existence of predetermined image (the predetermined image is understood to be previously stored, and is likely a part of the whole image) of a web homepage address (e.g., URL), where at this point, the address is in an image form. Once the obtained image is identified as, or contains the predetermined image, an extracting device extracts the identified predetermined image (e.g., URL address of a web homepage) and uses the extracted address of the homepage to access, with an accessing device (e.g., computer, browser), that homepage.

It is understood that the invention is obtaining, interpreting, and extracting image data and not merely accessing a hyperlink embedded in an HTML document (as one would with a browser by selecting a hyperlink) or otherwise scanning HTML source or other source for a URL.

2. The closest prior art combination of Morris, Lu, and Fernandez fails to disclose extracting the address of a homepage from a predetermined image and accessing that address.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
